CATALOGUE OF THE POLLEN & SPORE
EXCHANGE COLLECTION
NATIONAL MUSEUM OF NATURAL SCIENCES

NATIONAL MUSEUM OF CANADA

✓ Syllogeus includes papers on natural sciences and closely related topics that are not immediately appropriate for inclusion in other publications, and are issued in either English or French. Syllogeus appears at irregular intervals, and individual issues are available from the Library or the Director, National Museum of Natural Sciences, Ottawa, K1A 0M8, Canada.

La collection Syllogeus réunit un certain nombre d'articles sur les sciences naturelles ou sur des sujets qui leur sont apparentés, et qui sont publiés soit en français, soit en anglais. Les articles paraissent irrégulièrement et on peut les obtenir de la bibliothèque des Musées nationaux ou du cabinet du Directeur du Musée des Sciences naturelles, Ottawa, K1A 0M8, Canada.

CATALOGUE OF THE POLLEN AND SPORE EXCHANGE COLLECTION
NATIONAL MUSEUM OF NATURAL SCIENCES

The purpose of this catalogue is to list all available exchange slides of extant pollen and spore taxa stored at the National Museum of Natural Sciences. The Museum will exchange this material on a one to one basis with any institution or person who has pollen or spore slides prepared by standard techniques.

All material listed herein was prepared using the standard KOH-Acetolysis method as described by Erdtman (1960, 1969), mounted in glycerine jelly and sealed with Glyptal coating. Some preparations are stained with Safranin-O. For a complete description of the methods used in the preparation of this material see Jarzen (1977).

The catalogue is arranged with the "lower plants" first followed by the Gymnospermae, Monocotyledoneae and Dicotyledoneae. Within each group the taxa are listed alphabetically by genus and species. Herbarium designations are given in Holmgren and Keuken (1974). Family names are for the most part those given by Airy Shaw (1973).

To request an exchange, please indicate the desired species using the number which precedes the plant name.
